

ABSTRACT

EPrT (English Profeciency Test) is Telkom University version of paper-based TOEFL. It's a written test covering listening, grammar and reading to give a prediction for ITP TOEFL or IBT TOEFL score. At this time, the implementation still manually by using paper and check manually too. Therefore, appeared an idea to build a web based application to facilitate EPrT test implementation. This application built use PHP language and CodeIgniter framework. The application is assesed good enough to be able to help the implementation of EPrT tests. this application can also do other activities besides EPrT test in language center of telkom university but also learning about the EPrT's material and do exercise before doing the EPrT test.

Keywords: EPrT (English Profeciency Test), Aplication, Website, PHP, CodeIgniter.
