

LIST OF FIGURE

Figure I. 1 Waste composition in Bandung (Civil Cleaning. 2008)	1
Figure I. 2 SOLAIR Incinerator in Telkom University	2
Figure II. 1 Design process according to Pahl and Beitz (1998)	8
Figure II. 2 The central activity of engineering design.....	8
Figure II. 3 Part of the systematic engineering design process model.....	9
Figure II. 4 SOLAIR Incinerator in Telkom University	2
Figure II. 5 Flow process of SOLAIR Incinerator	13
Figure II. 6 Fundamental elements of product Architecture modularity	14
Figure II. 7 Generic product structure and modular system	22
Figure II. 8 Functional classification in modular product systematic	27
Figure II. 9 Extended modularization process based on VDI 2223.....	28
Figure II. 10 Function structure and C&CM representation	29
Figure II. 11 Diagram of search algorithm	31
Figure II. 12 The example of DSM square matrix	45
Figure II. 13 DSM Taxonomy (adapted from R.C Dorf ,1999).....	41
Figure II. 14 cluster modular decomposition of product XXX	45
Figure II. 15 Failure Mode and effect Analysis Worksheet	46
Figure III. 1 Conceptual Model	50
Figure III. 1 Problem Solving Systematics	52
Figure IV. 1 SOLAIR incinerator left view	57
Figure IV. 2 SOLAIR incinerator right view.....	58
Figure IV. 3 Flowchart SOLAIR	61
Figure V. 1 Component schematic of SOLAIR from top view	67
Figure V. 2 Integration system	68
Figure V. 3 Final Component clustered	95
Figure V. 4 SOLAIR incinerator left view	96
Figure V. 5 Basic Function Components	97
Figure V. 6 Function structure	97
Figure V. 7 Rough layout of existing incinerator with C&CM representation....	100
Figure V. 8 C&CM representation.....	100
Figure V. 9 C&C-A description of the process.....	101
Figure V. 10 Extended process VDI2223	101
