

PREFACE

All praise may be to Allah the most highest who gives us blessing in body and soul , because of His grace and guidance i can finish this final project with the title “PROBLEM ANALYSIS OF SOLAIR INCINERATOR USING MODULARIZATION AND OF CONTACT AND CHANNEL MODEL (C&CM) APPROACH AS A REFERENCE FOR DESIGNING THE IMPROVEMENT OF PRODUCT ARCHITECTURE” as one of the requirements for completing the S-1 Industrial Engineering major of Telkom University.

I would like to gratitude to :

1. My mother ,the only ones who support me all the time . She is the reason why I'm still survive in all conditions.
2. Mr. Rino Andias Anugraha., ST. MM. as my first final project advisor. Also helped and guided me in lots of things especially in my final project, academic affairs.
3. Mr. Muhammad Iqbal., ST. MT. as my second final project advisor. Also helped me in discussing lots of academic things and guide me through making of my final project, laboratory affair etc.
4. 5. Mr. Teddy Sjafrizal., B.Eng(Hons), Msc. As my advisor of my study plan, laboratory affairs and discussions through my experience in Telkom University.
5. To all of my friends who always support me when I almost give up .
6. To my little sister and brother assistants in Technical Drawing and Studio Design .Thanks for all of support and cheers me up . May all of you are be success in future .
7. Espicially to Annisa Falimantik (Icha) and Dian Hitadari ,thanks to cheers me up , listen me and understand me . We have love story that almost the same.
8. Thanks to All of friends in PDEV Laboratory.
9. Thanks to my sista, Anabela and Ditya.
10. Thanks a lot to Mr.Hari who teach me about clustering algorithm.
11. Thanks to cabelita.

12. To Wisuda Pura (WSD) ,thanks a lot for everything . You are best firend.
13. Thanks to Tri Imam Wicaksono (MAM) .
14. The one who ask my final project progress every day ,sing a lot of album in one hour to cheer me up . My fussy friends, M. Reza Yuditha .Thanks a lot bro.

The authors recognize that this final project does not escape from the flaws and errors. Therefore, the authors expect criticism and constructive suggestions for improvement of the process of this Final. Hopefully this final project can provide benefits to authors and parties related to this field.
