

PREFACE

Praise and thanks giving to Almighty God for the blessings that have been given, health, and wisdom to the author to finish the final project well. The final project entitled "Designing Stock Take Policy for Reducing Total Cost of Stock Take Cycle Counting Method Using in Raw Material Distribution Center of PT XYZ" is one of the requirements for completing undergraduate education in Industrial Engineering at Telkom University.

1. Jesus Christ that always bless the authors for giving wise, so the authors able to finish this final project.
2. To my beloved parents, Mr. Melkion Panjaitan and Mrs. Rine Sitorus for always share a love and the joyfull for the research and support the authors.
3. Management of Industrial Engineering Faculty, thank you for providing the authors the hilarity and hospitality as a student college of this faculty.
4. My Advisor, thanks for Mr. Ari Yanuar Ridwan and Budi Santosa for guidance and insight given, that the authors gained insight regarding supply chain in terms of academic and practical. Thank you for your help so that the completion of this final project can proceed smoothly.

The author realizes that this final task is still far from perfection. This is due to the limitations that are owned by the author. Therefore, to fix this thesis suggestions and constructive criticism is expected. final task authors hope this can be useful for readers and writers, as well as for education.
