ABSTRACT

Traveling is an activity that is done by people in the world. But, people have less tendency to travel when they have lack of knowledge about destination area. Besides, robbery and fraud became another factor of this reason. In order to overcome that condition, a mobile application is needed, so people can travel comfortably. This mobile application should have function to display people journal activity, searching for tour spot, and can respect to an account for creating good journal.

Keywords: Traveling, Traveler, Mobile Application.
