

ABSTRACT

RSMB or Rumah Sakit Muhammadiyah Bandung is a private hospital in Bandung. According to a statement from the head of the logistics, RSMB until now has its own way of arranging the whole process of logistics such as goods collection, record keeping requirements, submission of procurement, ordering requirements, receipt of goods, and the distribution of goods. The ineffectiveness of existing SOPs will be an obstacle in the procurement of goods contained in RSMB. In addition to the SOP that is not well run, nominal monthly large procurement transactions becomes a major factor to implement a system that can integrate various divisions, especially relating to procurement. For the implementation of the procurement system using ERP can be used to support the business processes of goods logistics penadaan RSMB.

This research is using the purchase management module on Odoo designed with Soft Systems Methodology and be adapted to RSMB needs. Soft Systems Methodology is a framework solutions designed specifically for situations where the nature of the problem is difficult to define and with these methods stakeholders can provide feedback and corrections directly. By applying purchase modules in Odoo on RSMB management in the procurement process of the request made by the warehouse can be done easily. The accounting can easily confirm transactions and invoice validation with this system.
