

ABSTRACT

General facilities that support for Muslims include the sharing of the mosque area in general, the mosque is a Muslim religious facilities that can accommodate the number of worshipers in more .Build mosque should be open to the public from outside the campus invitees to enter and happy to be in the neighborhood this mosque to worship in it as well as amenities Islam Salman Mosque activities become an important component given the vision of Salman Mosque wants to make independent campus mosque as a container human development, community development, and the development of Islamic civilization. As the development of facilities in the Trustees Foundation Salman Mosque ITB not developed directly in conjunction with the Salman Mosque ITB specifically designed by architect Ir. Achmad Noe'man so different from the interior design in terms of design Mosque Salman ITB, besides some space not functioned well so it appears void of function space and a build up of function space in several areas supporting facilities Pembina Foundation Salman ITB are not designed to match the exact requirement, then takes a character that suits Salman mosque ITB design and space utilization in accordance with need
