LIST OF TABLES

2.1 test in the DEST 9

3.1 The differences of manual assessment and assessment using proposed system 17
3.1 The differences of manual assessment and assessment using proposed system 18
3.2 Signs/symptoms of Dyslexia based on literature and observations 20
3.2 Signs/symptoms of Dyslexia based on literature and observations 21
3.2 Signs/symptoms of Dyslexia based on literature and observations 22
3.3 subtest in the DEST 25
3.4 The result of third Piloting 37
3.5 The fourth piloting result of fourth piloting 37
3.6 The respondents of fifth piloting instrument 38
3.7 The result of Main Screening Piloting 39
3.8 True positive, false positive, true negative, false negative, and accuracy of main screening piloting 40
3.9 The result of Deep Screening Piloting 41
3.10 Confusion matrix of Deep Screening Piloting 42
3.11 The result of accuracy Deep Screening Piloting 42
3.12 Example of Neigbor words and rule 61
3.13 Example of Document Planning 73
3.14 Example of bigram frequency 97
3.15 Example of trigram frequency 97
3.16 Example of trigram frequency 99
3.17 Example of Document Planning 107
3.17 Example of Document Planning 108
3.17 Example of Document Planning 109
3.18 Functionality requirement specification of data processing 123
3.19 Functionality requirement specification of data processing 124
3.20 Experiment scenarios of the accuracy of identification process 126
3.21 Experiment scenarios of the accuracy of identification process 127
3.22 Experiment scenarios of the naturalness of main screening from the perspective of the parents 129
3.23 Experiment scenarios of the naturalness of main screening from the perspective of the experts 130
3.24 Experiment scenarios of the naturalness of deep screening from the perspective of the experts 130
3.25 The Respondents of Identification result Testing 131
3.26 Confusion Matrix of Deep Screening 134
3.27 Accuracy classification by AUC for a diagnostic test 135

4.1 Functional test of data processing 137
4.2 Functionality requirement specification of data processing 137
4.3 The result of access performance in Java Island 152

4.3 The result of access performance in Java Island 153
4.4 The result of access performance in Outside Java Island 154
4.4 The result of access performance in Outside Java Island 155
4.5 The result of main screening testing 155
4.6 The result of deep screening testing with the previous questionnaire . . . 157
4.7 The result of deep screening testing 158
4.8 The clarity of main screening reports from the perspective of the parents 159
4.9 Readability of main screening reports from the perspective of the parents 160
4.10 Clarity of main screening reports from the perspective of the experts . . 161
4.11 Readability of main screening reports from the perspective of the experts 162
4.12 General Appropriateness of main screening reports from the perspective of the experts 163
4.13 Clarity of deep screening reports from the perspective of the experts . . 164
4.14 Readability of deep screening reports from from the perspective of the experts 165
4.15 General Appropriateness of deep screening reports from the perspective of the experts 167
4.16 Analysis of main screening sensitivity, specificity, and accuracy 171
4.17 Confusion Matrix of Deep Screening Result in SD Fithrah Insani & Indigrow174
4.18 The sensitivity, the specificity, and the accuracy of deep screening in SD Fithrah Insani & Indigrow 175
4.19 The AUC result of Deep Screening in SD Fithrah Insani & Indigrow . . 177
4.20 Confusion Matrix of Deep Screening Result Revised Deep Screening Questionnaire 179
4.21 The result of the sensitivity, the specificity, and the accuracy of Deep Screening 180
4.22 AUC result of Deep Screening 181
