ABSTRACT

Olshopherbaltiens is an online store (online shopping) that sells various needs of health food from Tiens Companies. Based on the issues that are on olshopherbaltiens then built applications that help in the process and the product sales data processing such as customer data, product data and transaction data. In addition built-in application can also provide the broadcast message to all customers who have integrated data with this application.

The methods used in the development of this application is the RAD method with the reason for the time that is needed in the development of the application is short. The tools used is Oracle Application Express (OAE), notepad++ and balsamiq. The sales application supplemental food is intended to give ease to the owner in the transaction process and assessment of the list of consumer shopping.
