## LIST OF FIGURES

Figure 1 The DDoS detection in the existing method [1] .....	2
Figure 2 The real traffic on minute 20th - 25th, detected as a DDoS [1] .....	3
Figure 3 (1) or (b) is an existing traditional network [4].....	7
Figure 4 The spesification od SDN OpenFlow [5] .....	8
Figure 5 SDN architecture with OpenFlow protocol [5] .....	8
Figure 6 Simple network using OpenFlow protocol [7] .....	9
Figure 7 DDoS detection in traditional network.....	12
Figure 8 OpenFlow table entry [1] .....	13
Figure 9 Example of a Kohonen's SOM map [17] .....	15
Figure 10 Research framework .....	17
Figure 11 The DDoS detection in the existing method [1] .....	19
Figure 12 Flow chart of design method.....	20
Figure 13 Topology scenario of simulation .....	22
Figure 14 Method comparison .....	24
Figure 15 The opening of mininet with external controller .....	25
Figure 16 Traffic for scenario 1 with ununiform pattern.....	30
Figure 17 Traffic for scenario 1 with almost uniform pattern.....	31
Figure 18 Traffic for scenario 1 with sudden increased .....	31
Figure 19 20M traffic injection for scenario 2 (attack simulation).....	32
Figure 20 Ununiform traffic simulation.....	34
Figure 21 Almost uniform traffic simulation .....	34
Figure 22 20M traffic injection on second 83.....	35
Figure 23 Entropy and entropy threshold in scenario 1.....	36
Figure 24 20M traffic injection on second 74.....	37
Figure 25 Entropy and entropy threshold in scenario 2.....	38
