

Abstract

Hindian Online is web base strategy game application which tells the Kingdoms of Java island. The history would be told to players by trivia game at official site as simple quiz.

Hindian Online's system has some features like the other games as buiding, war and resources management. Its main difference is based on its history and culture concept which takes java kingdom's theme that make it really looks like kingdom of java island. Hindian Online's system also has admin page which can maintain the datas of its game.

We choose game as learning media of history because game has its own attraction on telling method. We hope after getting part of history and culture from the game, players can learn about the history of the kingdom of Java island.

Keywords: trivia, game, official, system.
