

## DAFTAR ISI

|                                                  |      |
|--------------------------------------------------|------|
| ABSTRAK .....                                    | i    |
| ABSTRACT .....                                   | ii   |
| KATA PENGANTAR.....                              | iii  |
| UCAPAN TERIMA KASIH.....                         | iv   |
| DAFTAR ISI.....                                  | vii  |
| DAFTAR GAMBAR .....                              | x    |
| DAFTAR TABEL .....                               | xi   |
| DAFTAR SINGKATAN.....                            | xii  |
| DAFTAR ISTILAH .....                             | xiii |
| BAB I PENDAHULUAN .....                          | 1    |
| 1.1    Latar Belakang.....                       | 1    |
| 1.2    Perumusan Masalah.....                    | 2    |
| 1.3    Tujuan.....                               | 3    |
| 1.4    Batasan Masalah.....                      | 3    |
| 1.5    Metodologi Penyelesaian Masalah .....     | 4    |
| 1.6    Sistematika Penulisan TA.....             | 4    |
| BAB II LANDASAN TEORI .....                      | 6    |
| 2.1    Jaringan <i>Wireless Ad Hoc</i> .....     | 6    |
| 2.1.1    Kelebihan <i>Wireless Ad Hoc</i> .....  | 6    |
| 2.1.2    Kekurangan <i>Wireless Ad Hoc</i> ..... | 6    |
| 2.2 <i>Mobile Ad Hoc Network</i> (MANET) .....   | 7    |

|                                               |                                                            |    |
|-----------------------------------------------|------------------------------------------------------------|----|
| 2.2.1                                         | Karakteristik MANET .....                                  | 7  |
| 2.2.2                                         | Aplikasi MANET .....                                       | 8  |
| 2.3                                           | <i>Vehicular Ad Hoc Networks</i> (VANETs) .....            | 9  |
| 2.3.1                                         | Karakteristik VANET .....                                  | 11 |
| 2.3.2                                         | Aplikasi VANET .....                                       | 12 |
| 2.4                                           | <i>Routing Protocol</i> berbasis topologi pada VANET ..... | 13 |
| 2.4.1                                         | Proaktif ( <i>table-driven</i> ) .....                     | 13 |
| 2.4.2                                         | Reaktif ( <i>On-Demand</i> ) .....                         | 13 |
| 2.5                                           | AODV .....                                                 | 14 |
| 2.6                                           | Standar untuk <i>Wireless Access</i> pada VANET .....      | 16 |
| 2.6.1                                         | <i>Dedicated Short Range Communication</i> (DSRC) .....    | 16 |
| 2.7                                           | Simulasi VANET .....                                       | 17 |
| 2.7.1                                         | <i>Mobility Simulator</i> .....                            | 18 |
| 2.7.2                                         | <i>Network Simulator</i> .....                             | 20 |
| 2.8                                           | Parameter <i>Quality of Service</i> (QoS) .....            | 20 |
| 2.8.1                                         | <i>Average End-to-End Delay</i> .....                      | 21 |
| 2.8.2                                         | <i>Average Packet Delivery Ratio</i> .....                 | 21 |
| 2.8.3                                         | <i>Average Throughput</i> .....                            | 21 |
| BAB III ANALISIS DAN PERANCANGAN SISTEM ..... |                                                            | 23 |
| 3.1                                           | Kerangka Pemecahan Masalah .....                           | 23 |
| 3.2                                           | Sarana Penunjang Simulasi .....                            | 24 |
| 3.2.1                                         | Perangkat Keras .....                                      | 24 |
| 3.2.2                                         | Perangkat Lunak .....                                      | 24 |
| 3.3                                           | Pemodelan Sistem .....                                     | 25 |

|                                             |                                                                     |    |
|---------------------------------------------|---------------------------------------------------------------------|----|
| 3.3.1                                       | Pembangunan Model Sistem.....                                       | 25 |
| 3.4                                         | Diagram Alir.....                                                   | 27 |
| 3.5                                         | Skenario Simulasi.....                                              | 28 |
| 3.5.1                                       | Lingkungan Perempatan Jalan Kota.....                               | 29 |
| 3.6                                         | Pembuatan Simulasi .....                                            | 31 |
| 3.7                                         | Parameter Simulasi.....                                             | 34 |
| 3.7.1                                       | Parameter Masukan.....                                              | 34 |
| 3.7.2                                       | Parameter Keluaran.....                                             | 34 |
| BAB IV HASIL SIMULASI DAN ANALISIS .....    |                                                                     | 35 |
| 4.1                                         | Analisis Performansi Protokol Routing Terhadap Jumlah Node .....    | 35 |
| 4.1.1                                       | Analisis <i>End-to-End Delay</i> .....                              | 35 |
| 4.1.2                                       | Analisis <i>Packet Delivery Ratio</i> .....                         | 39 |
| 4.1.3                                       | Analisis <i>Throughput</i> .....                                    | 43 |
| 4.2                                         | Analisis Performansi Protokol Routing Terhadap Kecepatan Node ..... | 47 |
| 4.2.1                                       | Analisis <i>End-to-End Delay</i> .....                              | 47 |
| 4.2.2                                       | Analisis <i>Packet Delivery Ratio</i> (PDR).....                    | 49 |
| 4.2.3                                       | Analisis <i>Throughput</i> .....                                    | 50 |
| BAB V KESIMPULAN DAN SARAN .....            |                                                                     | 53 |
| 5.1                                         | Kesimpulan.....                                                     | 53 |
