

DAFTAR PUSTAKA

1. Alsager, A. F. (2011). *Design and Analysis of Microstrip Patch Antenna Arrays*. Thesis Master of Science with a Major in Electrical Engineering – Communication and Signal Processing. School of Engineering , University College of Borås. [Online]. Tersedia : https://www.academia.edu/31252988/This_thesis_comprises_30_ECTS_credits_and_is_a_compulsory_part_in_the_Master_of_Science_with_a_Major_in_Electrical_Engineering_Communication_and_Signal_processing_Design_and_Analysis_of_Microstrip_Patch_Antenna_Arrays [17 Februari 2015]
2. Balanis, C. A. (2005). *Antenna Theory Analisis and Desain 3rd edition*. United States : Wiley InterScience.
3. Casu, G., Moraru, C., dan Kovacs, A. (2014). *Design and Implementation of Microstrip Patch Antenna Array*. Communications (COMM), 2014 10th International Conference On. Tersedia : <http://ieeexplore.ieee.org/document/6866738> [28 Juli 2014]
4. Horwath, B. (2012). *Microstrip Patch Antenna Design Principles*. SCU Center for Analog Design and Research. [Online]. Tersedia : <http://students.engr.scu.edu/~bhorwath/presentations/Microstrip%20Patch%20Antenna%20Design.pdf> [29 November 2014]
5. Itoh, T., dan Mittra, R. (1972). *Analysis Of Microstrip Transmission Lines*. Scientific Report. Engineering Experiment Station, University of Illinois. [Online]. Tersedia : <http://www.dtic.mil/dtic/tr/fulltext/u2/746059.pdf> [6 April 2015]
6. Khraisat, Y. S. H. (2012). *Design of 4 Elements Rectangular Microstrip Patch Antenna with High Gain for 2.4 GHz Applications*. Modern Applied Science, 6(1):68-74. [Online]. Tersedia : <http://ccsenet.org/journal/index.php/mas/article/view/12540> [4 April 2015]
7. Kurniawan, B. Y. (2011). *Perancangan Dan Realisasi Antena Array Mikrostrip 6 Elemen Pada Frekuensi 2,35 GHz Dan 3,35 GHz*. Tugas

- Akhir Diploma 3, Fakultas Ilmu Terapan, Universitas Telkom. [Online]. Tersedia :
<https://openlibrary.telkomuniversity.ac.id/pustaka/29426/perancangan-dan-realisisi-antena-array-mikrostrip-6-elemen-pada-frekuensi-2-35-ghz-dan-3-35-ghz.html> [21 November 2011]
8. Nachwan, M. A. (2001). *Modul Antena dan Propagasi*. Bandung : STT Telkom.
 9. Ojha, J. R., dan Peters, M. (2010). Patch Antennas and Microstrip Lines, Microwave and Millimeter Wave Technologies Modern UWB Antennas and Equipment, Igor Mini (Ed.), ISBN: 978-953-7619-67-1, InTech, [Online]. Tersedia : <http://www.intechopen.com/books/microwave-and-millimeter-wave-technologies-modern-uwbantennas-and-equipment/patch-antennas-and-microstrip-lines> [29 November 2014]
 10. Pambudhi, H. T., Darjat, D., dan Zahra, A. A. (2010). Perancangan dan Analisis Antena Mikrostrip dengan Metode Aperture Coupled Feed pada Frekuensi 800 MHz. *TRANSMISI*, 12(1), 14-20. [Online]. Tersedia : <http://ejournal.undip.ac.id/index.php/transmisi/article/view/3594> [21 November 2011]
 11. Rahmawati, E., Setijadi, E., dan Hendrantoro, G. (2013). Optimasi Antena Mikrostip Rectangular Patch Polarisasi Sirkuler pada Frekuensi 2.4 GHz dengan Algoritma Genetika untuk Satelit Nano. *JURNAL TEKNIK POMITS*, 2(2). [Online]. Tersedia : <http://ejurnal.its.ac.id/index.php/teknik/article/view/3337/996> [11 Februari 2015]
 12. Wikipedia. (2017). Electrical Resistivity and Conductivity. [Online]. Tersedia : https://en.wikipedia.org/wiki/Electrical_resistivity_and_conductivity [10 Juli 2017]
