

Preface

Thank to Almighty God who has given His bless to the writer for finishing the Final project entitled "Path Selection of Garbage Truck using A* Algorithm and Population Density Score". The writer also wish to express his deep and sincere gratitude for those who have guided in completing this final project. I would like to express my special appreciation to my advisor, Kiki Maulana Adhinugraha, Ph.D. and Ibnu Asror, S.T., M.T. for their valuable assistance and inspiration to the completion of this Final project. Hopefully, this final project can help many people. This Final project is the final task that is proposed to qualify in obtaining a Bachelor of Informatics Engineering in study program of Informatics Engineering Telkom University. The author realizes that this writing will not be realized without the help and encouragement of various parties. Therefore the authors express their gratitude to :

1. Prof. Mochamad Ashari, Ph.D as a Rector of Telkom Univeristy.
2. Ir. Moch. Arif Bijaksana, M.Tech., Ph.D. as a head study program of Informatics Engineering.
3. Kiki Maulana Adhinugraha, Ph.D. as a supervisor 1 and Academic Advisors who help me until finis this final project.
4. Ibnu Asror, S.T., M.T. as a supervisor 2 who help me until finis this final project.
5. Lia Kurniawati Student environmental Engineering in Diponegoro University who give me all data to complete this final project.
6. Badan pusat statistik that give me some support data to complete this final project.
7. SIGT Tegal city that give me some support data to complete this final project.

Contents

Abstrak	i
Abstract	ii
Dedicated Page	iii
Preface	v
Table of Contents	vi
List of Figure	viii
List of Table	x
I Introduction	1
1.1 Background of the Problem	1
1.2 Research Question	3
1.3 Purpose of The Study	3
1.4 Limitation Of Problem	3
II literature review	4
2.1 System Collection the Garbage	4
2.1.1 Door to door	4
2.1.2 Collection system indirectly	5
2.2 GIS(Geografic Information System)	6
2.2.1 Euclidean Distance	8
2.3 A*(A Star) Algorithm	9
III Metodologi dan Desain Sistem	11
3.1 System Description	11
3.2 Research methods	11
3.3 Flowchart	13
3.4 System specifications	14
