

ABSTRACT

Many prospective students or prospective employees failed to be accepted because score of the Academic Potential Test does not meet with the minimum standards that have been determined by the test organizers. Failure does not mean the low level of intelligence exam participants, but the understanding of exam participants about the Academic Potential Test is still very less because of lack of practice to do the Test Academic Potential Test, to face the test to be implemented. So prospective test participants are strongly encouraged to practice doing the Academic Potential Test before doing the real test. Academic Potential Test Application is a Web-Based Application that can facilitate prospective participants in practicing the Academic Potential Test that provides autoskoring and discussion so that they can better understand the material. From the test results performed, the system functionality running well. All systems are running as expected.
