ABSTRACT

Seeing the condition of orphan and derelict children which are getting worse, so it would require a special by concerning like design a supportive environment to help them grow both physical and psychological optimally. The orphanage is a social institution that has the duty to provide facilities and services to orphaned and abandoned children so that his personality may develop properly. . As the vital environment for those children, the orphanage must has good standart for provision of care services and facilities. The aim of this program is to design a suitable interior for the orphanage, as the result it will fulfill their physical and psychological needs. This design uses the concept of " train self-reliance " and the theme of “warm and fun with new family in the hope that children can learn and apply science independent in daily life but still enjoyable and comfortable for children. By concern in the space layout, ergonomics and the facilities are provided that suitable for the children's activities and the application for the rooms itself.
