

## ***ABSTRACT***

---

*The cafe is a good place to use as a place to gather or just relax to unwind after the move. Cafes usually provide food and soft drinks as vegetarian and there is also live music as an addition to entertainment for the visitors who come. In Indonesia, especially in the city of Bandung. There are so many unique and good cafes, but there are also many people who do not know about the cafes because of the limitations of information distributed by these cafes. Therefore, it can also help the cafe in distributing cafe information to the community and help visitors in finding the desired cafe information. The method used to make this Web-Based Cafe Portal Bandung by using Waterfall Method. The programming language used is PHP with Code Igniter framework and MYSQL database and Gammu for SMS Gateway as a tool for sms distribution.*
