ABSTRACT

Inclusive education in general is an education program that combines children with

special needs to receive the same education with other normal children. Inclusive education

actually has the same curriculum as regular as a regular school, the only difference is the

method. Special needs children sometimes have the potensial excessive compared with other

normal children. Incorporating special needs children into spesial school is not the right thing,

because in the special school, the children will be given the facility according with their

limitation.

Alfa centauri elementary school is a school that implement inclusive education system.

There are 3 types of children with special needs ie Autism, ADD/ADHD and Dyslexia. In

supporting the learning process of children with spesial needs, the necessary facilities that suit

the need of each child. School with the inclusive education concept should have a therapy room

facilities for children with spesial needs. Therapy for children with spesial needs are given in

multidisciplinary, there are three groupings of therapy, there are psychological, medical and

educational.

Therapy room facilities will be provided at this time in the form of designing therapy

room that supports the educational process at school. Autism children, ADD/ADHD and

Dyslexia required therapy room facilities such as room sensory integration therapy, behavioral

therapy room, one on one room, the tantrum room, and a small classroom. Autism children,

ADD/ADHD and Dyslexia suffered damage to the left hemisphere, the language part. So they

cant imagine something abstract. Its a neccessary to design classroom that can facilitate

understanding and strengthen memory.
