ABSTRACK

Pre-school education in early childhood is a necessity for children from

birth to six years of age. Because at that time the child is in golden age, so it is

easier to absorb knowledge and active in moving and explore to find out new things.

For that, children at an early age requires full education parents or companion

substitute such as daycare and preschool in accompanying the development of child

development.

Bandung is the City of Education for Inclusive, so Early childhood woth girded by

anyone is no exception for Children with Special Needs. Inclusive school

demanding design that can be balanced between the demand for psychic childreen

with special needs and without. Especially in the area class so the child can be

focus for following activities. Through the method of analysis, surveys and

interview so the interior design of Daycare and Preschool with an atmosphere of

fun and Relaxing can give the impression of a cheerful but still comfortable.
