

ABSTRACT

Early-ages education could be an investation for human resources and cause development of nation more better. A few of early-ages education services in Bandung had applied learning concept of multiple intelligences which increased eight types of human intelligences, although learning concept of Multiple Intelligences couldn't worked optimally because enviroment and interior's facilities make the children less active. The Design would concerned all about interior elements such as, colour, material, securities, and design which increases children intelligences.

Key Word : Early-ages Education, Multiple Intelligences, Interior, Intelligence, Optimal
