

## **ABSTRACT**

a laptop charger is something that is most needed when the laptop battery has run out. When a laptop user wants to use the charger to recharge the discharged laptop battery, a problem with the tangled charger cable is usually found. Cable long charger becomes tangled usually based on the user putting or storing laptop charger carelessly. This becomes a problem when the user wants to use his laptop charger of course have to tidy it first before using it. In this design, the authors do the design as a solution that is a tool to store a laptop charger that will help laptop users do not get a tangled cable problem before using the charger

Keywords: Cable Charger, Tangle
