

ABSTRACT

Academic and Non-Academic Activities at Postgraduate Muhammadiyah University has a special role to the activities in it. Based on observations made at the Graduate School of Muhammadiyah University of Yogyakarta encountered obstacles or shortcomings made the proposed re-design Postgraduate University of Muhammadiyah Yogyakarta to support infrastructure facilities that can meet the effectiveness of space organization based on the grouping of activities, meet the achievement of standardization of infrastructure and space and goods. Achievement of facility targets, standardization, utilization of interior elements to aspects of Islamic concept management is still not applied maximally. So that needed interior design of Postgraduate by considering the organizational aspect of space based on functional, character, category and standardization of space in the effort of applying interior management to furniture management in academic and non-academic space. Application of standardization becomes the national reference to be applied as the basic provision of human space in the work activities. Re-design based on the problems obtained from the data which then analyzed the problems to get the way out of the design and application of the concept of Islamic themes in the interaction therein. The final result of design is design worksheet, visual exposure of three dimension based on Islamic concept applied by Muhammadiyah as visualization media for the redesign of Postgraduate of Muhammadiyah Yogyakarta University in the application of conceptual design elements and answer the problem.

Keywords: Standardization of Postgraduate, Muhammadiyah concept, Interior Element
