

INTERIOR DESIGN OF TRAMPOLINE PLAY CENTER

ABSTRACT

Elva Dwi Indahsari Mulyana. 1603144170. 2014. Perancangan Pusat Bermain Khusus Trampoline. Pengantar Tugas Akhir: Jurusan Desain Interior Fakultas Industri Kreatif Telkom University. The designing of trampoline play center against the background of the need for playing space is increasingly needed for the community. Starting from children and adults today requires playroom facilities as a means of gaining excitement. There are many different trends in playing activities at the current playground, such as a trampoline play center. Games with trampoline media are a trend that is the choice today. With trampoline media can make playing activities become interesting and make activities play with sports. So that with the existence of a special playing center for trampoline, it is the attraction of the community to visit.

The purpose and target of designing this trampoline play center is to make the design of a playing center for trampoline that can pay attention to the interior elements (layout, furniture layout and space, ventilation, lighting, materials, etc) that are appropriate and make the design of a trampoline play center by paying attention to the target age classification and needs that can provide comfort and safety to support all visitor activities.

The concept of open space can be an alternative than can be applied to the design of this trampoline play center. In the design of the trampoline play center, it is necessary to pay special attention to the processing of furniture layout and good circulation. In addition, it is also necessary to pay attention to other aspects such as, the use of materials, the use of color, ventilation, and lighting efforts to provide this trampoline play center must be accompanied by good planning and design, and must pay attention to the level of safety.

Keywords: Interior design, trampoline play center, age classification and needs.
