

## List of Tables

4.1	The characteristics of channels for Example 1,2, and 3. . . . .	21
4.2	Normal and critical depth and the channel's slope category for each flow in Example 1. . . . .	21
4.3	Normal and critical depth and the channel's slope category for each flow in Example 2. . . . .	23
4.4	Normal and critical depth and the channel's slope category for each flow in Example 3. . . . .	24
4.5	The summary table of backwater depth corresponding with different discharge rates and depths of sluice gate opening from examples in Section 4.2. . . . .	26
4.6	The minimum gate openings allowed for several given discharge rates at Manggarai sluice gate, Ciliwung river . . . . .	27
