

PREFACE

First and foremost, I would like to thank my Lord and Savior, Jesus Christ for giving me strength, knowledge, ability and opportunity to undertake this final year project, titled “MAINTENANCE POLICY OPTIMIZATION ON PRESS HYDRAULIC MACHINE USING RELIABILITY CENTERED MAINTENANCE (RCM) AND COST OF UNRELIABILITY (COUR)” and complete it satisfactorily. Without His blessings, this achievement would not have been possible.

I would also like to express my gratitude to all the people who has given direct and indirect contribution in order for me to complete this final year project. Thanks to:

1. Mr. Drs. Judi Alhilman, MSIE as advisor 1, for all the insightful guidance and for sparing his valuable time whenever I approached him and he showed me the way.
2. Mrs. Nurdinintya Athari S., S.Si., M.T as advisor 2, for all the session of academics and non academic talks, for every motivation and guidance she has given.
3. Mr. Erianto (HRD and GA Manager), Ms. Idza Nursia, Mr. Tuwardi and all of PT XYZ maintenance crew and employees who spent their valuable times helping the writer for collecting data as well as completing this final year project.
4. For all parties that help and contribute for this final year project to finish which can not be mentioned one by one.

Author is aware of all the flaws in this final year project and everyone is welcomed to give suggestions and constructive criticism for the refinement process. Hopefully this final year project can be helpful for those in need.
