ABSTRACT

Wagoon Coffee is one of the companies engaged in the field of coffee shop. Besides coffee, this cafe also provides a variety of lightmeal. The order process is done with the customer ordering, then it will be managed by the kitchen. When it's finished, the customer can pay in two ways, namely asking for a note or directly coming to the cashier and the cashier will provide proof of payment. In business processes that occur at this time there are often mistakes, such as recording, giving, and calculating the number of orders. Then needed a application that can assist in recording of order and payment. Created Web-Based EatMe Application on Wagoon Coffee Buah Batu. Making this application using PHP programming language with MySQL and waterfall method. This app has features that can facilitate in selling such as, digital ordering using tabs provided on each table, managing payment transactions, and managing orders.
