

ABSTRACT

The State Museum of Papua Province is one of the museums in Jayapura, Papua which has approximately 3600 art and cultural collections from Papua and West Papua. In fact, the museum is less desirable to be visited by the public because of the museum's interior conditions and the presentation of collections that are less attractive and of good care so it is necessary to redesign the museum for valuable and interesting interiors. To achieve this, the redesign of this museum takes the bright side of Papua adventure concept with the theme of the power of Papua which means inviting visitors to tour the museum to see the power of Papua from the other side so that the design of this museum will display a warm and comfortable atmosphere that is close to the daily life of the community Papua in terms of choosing colors, materials, accessories and interior elements in the redesign of the State Museum of Papua Province. With this redesign, the museum is expected to become one of the icons of the city of Papua that enhances the image of the city of Papua, enhances the conservation of Papuan culture, adds recreation places and adds education to Papuan culture.
