

## **ABSTRACT**

*The life of modern society does not escape from socializing or collaborating in business affairs to compete and become more competent. Coworking Space is a multifunctional building that combines the functions of offices and other functions in it. In addition Coworking is also more than just a Joint workspace but also a space to support each other. Today, Coworking Space is increasingly in demand especially by Freelancer as well as startup. Co-working is a new trend that supports freelancers or freelancers who have mushroomed in Europe, America, and Asia. By utilizing Coworking Space facilities for agencies and freelance is to save time and cost. Based on the facts and phenomena, then made the design of Bandung Coworking Space in the city of Bandung who have hope to be able to facilitate its users and expected each group and individual to be more mature for helping each other and building relationships in terms of business and information exchange*
