

ABSTRACT

Bandung is one of the big cities in Indonesia and is the capital of West Java Province that has a lot of history stored in the city. Bandung city has the potential of historical tourism is interesting and has a high education value one of which is a conservation building located on Jl. Braga. Museum of Bandung is one of a series of areas that present the history of the past and will come from the city of Bandung. Museum of Bandung Area consists of 3 masses of buildings whose main building is one of the Heritage Buildings that are preserved by the government of Bandung. The objects exhibited in this museum are the result of Bandung's culture and history from 1810 to 2017 and future development. Presented with a multimedia display that uses advanced technology with the help of narration and description. The final result of this writing is the application of Museum of Bandung atmosphere that is sophisticated and educational so as to attract the attention of visitors and can be used as a means of educational tourism for the citizens of Bandung.
