

ABSTRACT

Sales is an effort to improve the development of the company and bring profit to the company with the aim of getting the highest possible sales volume. Citra Oniq Company is a company engaged in natural stone crafts. To expand the market and improve the quality of business processes, Citra Oniq Company requires facilities so that the purpose of the above can be realized. One possible facility is the provision of web apps that can increase sales. Such web applications can be built using e-commerce concepts that enable online transactions. The results of this final project is an application that can help facilitate the interaction of buying and selling between sellers and buyers online. Waterfall method applied in making this final project which implemented with Object Oriented language PHP using Codeigniter which accompanied by MySQL database and other supporting software. Based on the results of the tests carried out, the application can help sales of goods at Citra Oniq store.
