

## ACKNOWLEDGEMENT

The first thing I have to say thank you is to God; Allah SWT. I do not know, perhaps I always being a complaining human but Allah SWT always give me an answer on how to solve it in the nicest way. I can't imagine why I am being here and still be good right now.

The second thing, papa and mama. It is cliches, but without them, I can't to fin-ish this undergraduate thesis. Actually, the reason is, they are my reason. They are my "cat-o'-nine-tails" while being finishing and struggling with this undergraduate thesis.

My lecturer, of course, for the next list. Mr. Adya, Mr. Erfan, Mr. Toni, and Mr. Khoirul. I can't even express my thank you for my lecturer. They are the great people who I have been met before. I have learned a lot from them and I can implement in my life, until now.

All of my colleagues who already help me in making this thesis, by giving literature, foods, drinks, supports, everything. I can't say their name because it is so many names on it.

Thank you.
