

ABSTRACT

Five times salat is a compulsory worship consisting of words and actions beginning with takbiratul ihram and ending with greetings with harmony and certain requirements. Salat is the main point for every Muslim who is already grown. Salat on the beginning of time is not an easy thing, especially in the midst of busy daily activities. This makes it difficult for us to fulfill Allah SWT's call at the right time. whereas Salat has a very big virtue and is the most afdhal practice (HR. Bukhari). One of the forms of technological advances in the field of wearable devices is the technology of smart watches.

Smartwatch is a device that has high computing capability. With this capability, the smartwatch offers facilities that are not available on ordinary watches. Salat monitoring application on smartwatch help to anticipate the delay in prayer, remind the user to perform prayer and help users more easily get a prayer schedule.
