

## ACKNOWLEDGEMENT

Praise to Allah SWT for all His grace so that writer can complete this mini-thesis proposal entitled “Model Prediction of the Next Runway Model Using Decision Tree and Random Foreset (Case Study: Big Four Fashion Week)”, as a requirement of Bachelor Degree in Management International ICT Business study program of Telkom University.

This paper is addressed to promote the opportunity of Big Data method in helping problems within cultural business industry, particularly fashion and modeling industry to using machine learning techniques.

In the process of finishing this thesis proposal, the author got support and guidance from all people around. Therefore, the author would like to say thanks to:

1. My family, papa, mama and my elder sister for endless love and support,
2. Mr. Andry Alamsyah, S.si., M.Sc. as the author’s thesis advisor for guiding the whole process of making and finishing this thesis proposal,
3. Mrs. Irni Yunita, ST., MM., as my academic supervisor,
4. Author’s friends, Batch 7 of International ICT Business, thank you for the friendship and memories we have made during study program,
5. Fellow researchers at Social Computing and Big Data Laboratory,
6. All the people who I cannot mention one by one, thank you.

The author hopes this paper can be beneficial for all the readers, moreover, criticism and suggestion regarding this thesis are very welcomed as an improvement of this thesis proposal. Thank you.
