

ABSTRACT

INTERIOR REDESIGN OF PT. DENSO INDONESIA'S OFFICE

Office nowadays, has work-hours that makes the staffs spending their times more than half day inside the office. That is why interior design is an important thing for office in order to make a comfortable place for working. PT. Denso Sales Indonesia is foreign investment company between Japan and Indonesia, which has headquarter office in Jakarta. The interior in PT. Denso Indonesia's office has some design problems, so it needs solutions to solve those problems, namely redesign. Interior redesign of PT. Denso Indonesia's office aiming to improve the office interior by fulfilling the needs of facilities and infrastructure corresponding the needs according to the standards and put some aesthetics to increase the productivity of the users. To support this design, it collects primary data, which is observation, interview, and documentation, and then secondary data which is literature and comparative study, and analysis data for final design. Interior redesign of PT. Denso Indonesia's Office will apply Open Space concept and will combine with modern office theme with ergonomic approach as the solutions to solve the design problems.
