

ABSTRACT

The division of dermatology is cosmetic dermatology which states that aspects of treating and preventing changes in the skin that are aesthetically unpleasant for the patient. Tivaza Clinic is a type of cosmetic dermatology clinic. Cosmetic Dermatology is a means for aesthetic treatment both in the skin, nails and hair. To attract visitors or patients, interior design is needed that takes into account the activities and ages of users. Because of these two things it can be a theme in the design of the room and manifested in the form of a concept of space that affects space users.

Tivaza Clinic will be designed in the city of Bumi Serpong Damai (BSD). The city of BSD is strategic because it is in a position close to the city center and the Jakarta government. Through analysis of building design and passing surveys with similar clinics, problems and the addition of supporting facilities related to the interior can be a reference so that they can be improved when designing. The concept of Lifestyle for All - Ages Space, namely the application of designs based on all ages can be a solution to support user activities and attract visitors.
