ABSTRACT

The Japan Foundation, Jakarta's Interior Design, aims to meet the space requirements based on the program of activities organized by the Japan Foundation, Jakarta; creating a design that is in line with the vision, mission, activities and objectives; and meet the provision of facilities in the form of temporary galleries, seminar and workshop spaces, language and cultural classes, auditoriums, libraries, and others based on activities proposed by The Japan Foundation.

The design of the Japan Foundation, Jakarta will be moved to the Summitmas II Building which is an office building adjacent to the Summitmas I Building with a building area of 2400m².

From the data analysis process above, the interior design starts from the forming elements of the space, the elements of the space forming, the relationship between spaces, and the organization of space that refers to the method of observation literature research, and comparative studies taking into account the design elements, principles, themes and concepts of the design of the Japan Foundation, Jakarta.

Key words: *The Japan Foundation, Jakarta, Jepang, Kebudayaan*
