

## **PREFACE**

First of all, praise and thanksgiving prayed to God because for all his gifts so we can finished this thesis entitled “Analysis of Sensors for Water Levelin in Early Warning System”. Thesis in which, it is one of the requirements to finish the Under- graduate Stduy Program of Telecommunication Engineering, Faculty of Electrical Engineering, Telkom University. In writing this thesis, The writer got a lot of assistance and advice from several individuals during the process of completing this Undergraduate Thesis.

The author realizes that the writing of the Final Project is far from perfect, this is due to the limitations of the writer. Therefore, to improve this Final Project, constructive criticism and suggestions are expected. With all humility, the authors hope that this Final Project can be developed to be better and can be useful for writers, readers, and the world of education.
