Bicycles are always innovating and growing. One of the environmentally friendly vehicles that has a history of development from time to time. Bicycles that have many benefits for the environment make bicycles always in demand. There are many bicycle communities in Indonesia and carry out events with the aim of providing education to the community. The special bicycle museum is intended to remember the many history of bicycles in Indonesia and the development of bicycles from time to time, considering that not many people know the history of bicycles from the time they were introduced to the present. And encourage and invite people to maintain health and the environment through sports activities. By designing the interior of the bicycle museum, it is hoped that the public will be interested and understand other things about bicycles. . The bicycle museum facility is very beneficial for the community, through interior design it can create a historical flow of bicycle developments from time to time. It can also provide an atmosphere that can give a character impression of the history of bicycles and the meaning of the bicycle itself. The bicycle museum can also help the community or association of old and modern bicycle enthusiasts to become more enthusiastic in maintaining and preserving the development of bicycles in Indonesia. The provision of facilities for the Bicycle Museum can also help bicycle collectors, which can be used as a place to show off their collections without worrying about maintenance problems and space problems for storage.
