*JL. Telekomunikasi No.1 Terusan Buah Batu, Sukapura, Bandung, Jawa Barat 40257.*

*Bandung College of Music is the first music college to be built in Indonesia and then it continues to experience an increase in enthusiasts from the beginning of its construction to date it has reached more than 350 enthusiasts. Due to the increasing number of enthusiasts, STIMB has a lack of facilities that can accommodate enthusiasts. Some existing facilities have not been able to support the ongoing curriculum, such as the lack of learning facilities in the form of Brass music studio classes, guitars, stringed instruments, and keyboards as well as several supporting facilities in the form of halls, lounges and recording studios. Redesign Bandung's College of Music was carried out to meet the shortcomings of the facilities that have been mentioned as well as to improve the interior elements in the form of acoustics, ventilation, lighting, circulation and ergonomics so that users are expected to be able to develop their own abilities and express their creativity in music through the facilities provided by this design.*
