

ABSTRAK

Design Creative School SD Muhammadiyah 1 Menganti Gresik, With Analogical Approach of Active Creative Activities

ABSTRACT

SD Muhammadiyah 1 Menganti, is a school with a type of Creative School. Prioritizing superior learning concepts in the form of educational and applicable learning concepts. The concept of educational learning means that the learning process is carried out in an interesting manner and in the end it will give a good impression to students. Meanwhile, the applicable concept is that learning is carried out in the form of active activities that invite students to directly practice the learning material, such as in outdoor class activities.

But in fact, until now, learning at SD Muhammadiyah 1 Menganti has not been able to run the school's flagship program. Some of the factors that influence it include space design that involves students, not yet well designed to support the desired learning concept. The spatial design that is currently found in exiting has a conventional arrangement like a public school, even though the creative school type should be able to provide a different atmosphere. With the flagship program of schools and types of schools, the design of learning spaces should be able to play a direct role in the learning process, and not only rely on practical media in the form of teaching aids.

Therefore it is necessary to redesign the learning room at SD Muhammadiyah 1 Menganti, which is able to answer problems encountered in school. Through an analogous approach to active and creative activities, spatial design can be created to be attractive, more than just a place to shelter learning activities, and the room can also be used as a direct material practice media.
