

CONTENTS OF FIGURES

Figure I.1. Data of Telkom University Facts 2020	1
Figure II.2. Flowchart of product design methods (Pahl and Beitz, 2007)	6
Figure II.3 Material Selection Stage (Mouritz, 2012).	13
Figure II.4 Preliminary design of Automated Dispenser	16
Figure III.1. Conceptual model	20
Figure III.2. Problem solving systematics' diagram	22
Figure III.3 Problem solving systematics' diagram (continuation)	23
Figure IV.1 The overall function of Automated design	40
Figure IV.2 The design of front perspective view.	42
Figure IV.3 Home design of flavored sparkling beverage	44
Figure IV.4 A diagrammatic perspective view.	46
Figure IV.5 Automated Dispenser's base tool design	47
Figure IV.6 The design of Automated Dispenser	48
Figure IV.7. Top gallon cover design	49
Figure IV.8 Final Design of Automated Dispenser	50
Figure IV.9 Engineering drawings of Automated Dispenser	51
Figure IV.10 Steps of lifting Gallon	52
Figure IV.11 Static Structural simulation settings	56
Figure IV.12 Setting Force given to the Automated Dispenser	57
Figure IV.13 Setting Fixed support of the Design	58

Figure 14. Integrated System Design of the Automated Dispenser	58
Figure V.1 Specifications of Automated Dispenser	60
Figure V.2 Evolution design	61
Figure V.3 Concept Visualization Design.	63
Figure V.4 Equivalent (Von-misses) simulation results of top loading	64
Figure V.5 Equivalent (Von-misses simulation results of bottom loading.....	64
Figure V.6 Illustration of a deformation simulation for top loading	65
Figure V.7 Illustration of a deformation simulation for bottom loading	65
Figure V.8 Detailed design of Automated Dispenser	67
