ACKNOWLEDGEMENTS

I praise Allah (SWT) - for his generosity, mercy, and bounty - who provided me the health, strength, and patience, guiding me through all the difficulties to start and then complete this work. I would never be able to finish it without the will of Allah (SWT).

I would first like to thank my thesis advisor Dr. Ade Romadhony S.T., M.T. of the School of Computing at Telkom University. The door to Dr. Ade Romadhony S.T., M.T. office was always open whenever I ran into a trouble spot or had a question about my research or writing. He/She consistently allowed this paper to be my own work, but steered me in the right the direction whenever he thought I needed it.

Finally, I must express my very profound gratitude to my parents and to my friends for providing me with unfailing support and continuous encouragement throughout my years of study and through the process of researching and writing this thesis. This accomplishment would not have been possible without them. Thank you.
