

ACKNOWLEDGEMENTS

There are several people that i would like to thank upon the completion of this thesis, first of all is for my supervisor, Dr. Arfianto Fahmi S.T., M.T and Dr. Nachwan Mufti A. S.T., M.T., that gives his straightforward guidance during doing this thesis. I want to thanks my father, mother and brothers which provide unparalleled support and encouragement for me in order to face my fears during the thesis, and financial support which without both of them, this research will not be completed. I also want to thanks to Jasya Bagus Prasetyo for being the support system and giving encouragement while finishing this Thesis. I hope my research will give interesting insight on how spam being processed in the future and this research will push forward knowledge as it is intended to be.
