

## **ABSTRACT**

### **INTERIOR DESIGN OF SOSROKUSUMAN HOTEL IN MALIOBORO WITH JAVANESE CULTURE APPROACH**

*Hotel Sosrokusuman is a hotel building complex that applies the traditional concept of a traditional house called Joglo with a symmetrical and separate layout like the Keraton Yogyakarta. This hotel belongs to the type of boutique hotel which is a hotel with its own unique architectural and interior concept. Thematic designs are something new for hotel visitors who will stay at boutique hotels. However, Hotel Sosrokusuman hasn't shown up the uniqueness of the cultural locality yet for a boutique hotel. The interior design method is carried out through the collection of architect data, programming, themes and concepts, as well as working drawings. The interior design with the theme "Javanese Priyayi" aims to create a visualization of the interior hotel that has an atmosphere of Javanese cultural locality.*

**Keywords:** *Boutique hotel, Interior design, Culture, Javanese.*
