Terusan Buah Batu, Sukapura, Bandung, Jawa Barat 40257*

The city of Bekasi is the second largest city in Indonesia, but interest in reading in Bekasi is still minimal. This is due to the rapid development of technology and also limited facilities and infrastructure. To be able to increase people's reading interest, a design that can cover all groups is needed without distinction of race, religion, education, occupation, etc. The method used in this design is in the form of data collection, data analysis, programming and determination of themes and concepts. The design of this library applies the concept of "Universal Design" which aims to create a library that can meet the needs of all people by creating designs that are user-friendly and friendly to users with disabilities. Thus, it is hoped that the interior design of the library can create a comfortable and pleasant atmosphere and can meet the needs of all circles of society so that it can attract public interest to visit the library and increase public interest in reading.

Keywords : *Library, Interior, Lifestyle, Bekasi City*
