**"Final Project:** Fine Arts Study Program, Faculty of Creative Industries, Telkom University"

Coronavirus Disease 2019 (COVID-19) was discovered at the end of 2019 in December to be precise in Wuhan City, Hubei Province, China and then spread to almost the whole world. Covid-19 is caused by a betacoronavirus. This became the author's idea in creating the final work entitled "Visualization of Recap of the COVID-19 Era in Photobook Works" aimed at the urgency of making works that are expected to produce works with deep content intentions, and the authors intend to create a form of creation through photobook media for the sake of making a media memoriam.

In this work "RAUT" is different from other photobooks which seem stiff and very minimalistic, the author plans to make the reader more relaxed in understanding the journey of the story with a relaxed narrative form that is not based on the usual elements of aesthetic composition.
