LPKA or Lembaga Pembinaan Khusus Anak is a correctional institution under the auspices of the Ministry of Law and Human Rights. The main goal of LPKA itself is to foster child who conflicted by the law by providing children's rights in the form of a good quality of life so that they can be accepted back into society with brand new knowledge and skills. One of the methods that could support child fostered citizens is to provide proper service facilities to bridge them in exploring skills and achieving a level of actualization within themselves. In present day, LPKA has spread in various regions in Indonesia, one of which is located in the city of Bandung, West Java, where its service facilities still do not click the standards in terms of grouping rooms based on their activities and the standards set for each service facility.. From the problems that became the formulation of the redesign of the LPKA Bandung service facilities, this design is expected to optimize the use of space and interior elements thus the achievement of self-actualization in children runs effectively. This self-actualization is an embodiment of skills training activities that have successfully trained children's skills and created a conducive and quality visiting process with families.

Keywords: *LPKA, children, service facilities, self-actualization.*
