

ABSTRACT

The Sumedang Regency Government Office is the center of government in Sumedang Regency which is also the Regent's Office, located on Jl. King Gajah Agung No.19, Situ, District. North Sumedang, Sumedang Regency, West Java 45621, this building has an area of 7,883m² consisting of three floors, with 193 employees who are divided into three assistants, one of whom is the Assistant for the Economy and Development, in charge of three parts, namely the economic section and SDA, the development administration section, and the procurement of goods and services section. This project is a project requesting cooperation from the Sumedang Regency Government with Telkom University Interior Design study program, a request from the Sumedang Regency Government office, that there is a need for a redesign of this office, currently the Sumedang Regency Government has implemented an Electronic-Based Government System (SPBE), and become the first best in Indonesia. With the implementation of the SPBE, there has been a change in the system and way of working, from initially doing more work with a manual system, changing to working with a digital system, a new system or way of working has an impact on designs that must be adapted to current activities, namely using more digital devices. , and can facilitate the performance of employees, besides that the application of the SPBE in the Sumedang Regency Government office must also be adjusted to the office design to be able to show the image of the office as the Regency with the best SPBE in Indonesia. After conducting field studies and observations, it was found that there were problems regarding spatial organization, the need for additional facilities, lighting that was not up to standard, a security system that was not good enough, and no Signage.

Key Words: Office, Government, SPBE
