

LIST OF FIGURES

1.1	Research Methodology	4
1.2	Communication Design of Grid	5
2.1	Hourglass IP-NDN Architecture	6
2.2	Flow of NDN Communication	7
2.3	CS, PIT & FIB Structure	7
2.4	NFD Modules	9
2.5	Forwarding Workflow	10
2.6	Traditional vs Modern Grid System	11
2.7	Classification of Grid Communication Based on Coverage Range & Data Rate	12
2.8	Architecture of Grid Communication	12
2.9	Domain of Smart Grid	13
2.10	Standard of Grid Communication	14
2.11	Traffic Queuing Classification Model Scheme	19
2.12	Structure of ndnSIM	20
2.13	NDN Packet Exchange Process in ndnSIM	21
3.1	Scheme Data Flow I	22
3.2	Scheme Data Flow II	23
3.3	Network Topology	26
3.4	Network Topology - 320 Node	27
3.5	Network Topology - 640 Node	27
4.1	Average Network Delay - System Models I	36
4.2	Detailed Avg. Network Delay - System Models I	37
4.3	Packet Hit Non Class	38
4.4	Cache Hit Non Class	38
4.5	Packet Drop in Node Utility - System Models I	39
4.6	Network Packet Drop - System Models I	39
4.7	Network Interest Timeout - System Models I	40
4.8	Delay in Node 15 - System Models II	40
4.9	Network Delay - System Models II	41
4.10	Cache Hit Ratio in Intermediate Router	42
4.11	Interest Request, Timeout & Packet Drop - System Models II	43
4.12	Total Interest Request - 320 Metering Device	44
4.13	Interest Timeout Ratio - 320 Metering	44
4.14	Interest Request vs Timeout - 320 Metering	45
4.15	Cache Hit Ratio - 320 Metering	45

4.16 Average Delay - 320 Metering	46
4.17 Packet Drop - 320 Metering	47
4.18 Total Interest Request - 640 Metering	47
4.19 Interest Request vs Timeout - 640 Metering	48
4.20 Detail Interest Timeout - 640 Metering	48
4.21 Average Delay - 640 Metering	49
4.22 Cache Hit Ratio - 640 Metering	49
4.23 Packet Drop - 640 Metering	50
