# LIST OF FIGURES

1.1 Container Traffic at Tanjung Priok Port From 2019-2022. . . . . 1
1.2 Tanjung Priok Port. . . . . 2

2.1 Generation of Mobile Network Technology . . . . . 8
2.2 3GPP Releases 12 through 19 and the 5G Timeplan. . . . . 8
2.3 5G Use Cases. . . . . 9
2.4 5G Frequency Spectrum Overview [5]. . . . . 10
2.5 Simple 5G Private Network Architecture in the Port [1]. . . . . 12
2.6 Ports Development History [6]. . . . . 15
2.7 Prototype of A Basic Architecture Smart port [7]. . . . . 16
2.8 Factors Affecting the 5G NR Link Budget [4]. . . . . 19

3.1 Research Flowchart. . . . . 25
3.2 Research Design Model. . . . . 26
3.3 5G Private Network Business Model. . . . . 26
3.4 Map of Tanjung Priok Port, North Jakarta [8]. . . . . 27
3.5 Inaportnet Work Flow. . . . . 28
3.6 Interface Atoll Network Simulator. . . . . 33
3.7 BHP Frequency ISR and IPFR. . . . . 38

4.1 Market User Forecasting in Port of Tanjung Priok from 2023 to 2027. 39
4.2 Traffic Demand Forecasting in Port of Tanjung Priok from 2023 to 2027. . . . . 40
4.3 Data Rate Prediction in Port of Tanjung Priok from 2023 to 2027. . 41
4.4 Number of gNodeB Based on Capacity Planning. . . . . 42
4.5 Number of gNodeB Based on Coverage Planning. . . . . 43
4.6 Placement of 17 gNodeB at Tanjung Priok Port. . . . . 44
4.7 Prediction SS-RSRP based on Simulator. . . . . 45
4.8 Histogram of SS-RSRP Calculation. . . . . 45
4.9 Prediction SS-SINR based on Simulator. . . . . 46
4.10 Histogram of SS-SINR Calculation. . . . . 46
4.11 Revenue Estimation of Implementation 5G Private for Port Industrial Area. . . . . 49

4.12 NPV Estimation of Implementation 5G Private for Port Industrial Area. . . . . 50
4.13 IRR Estimation of Implementation 5G Private for Port Industrial Area. 51
4.14 Three Types of Telecommunications Operators . . . . . 53
4.15 Detail of Special Telecommunication. . . . . 54
4.16 5G Private Network Frequency Benchmark. . . . . 55
4.17 Frequency Alocation for FR2. . . . . 55
